

BORA®

OUR STORY

BORA was founded in 2006, spurred on by the idea of creating a clamping straight edge that would allow effortless straight cuts on sheet goods. Our goal was simple — make a tool that made the job easier and faster without compromising the results. And so, we did. The Clamp Edge was made and BORA was born.

Over the years as our product lines have grown, our mantra has remained the same: create innovative tools that simplify tasks and deliver professional results. And by doing so, enable our users to increase productivity and expand not only their capabilities, but their workspaces as well. Because at BORA, we know that unless our tools are helping people complete projects faster and safer with better end results, we’re not doing our job.

From our Work Stands, Sawhorses, and Mobile Bases that offer the very best option for workspace mobility and flexibility, to our Saw Guides and Shop Accessories that provide efficiency and functionality for a wide variety of projects, BORA’s tools have been designed to endure the long days on the jobsite, at the workshop, or in your garage.

So, whether you’re a professional, DIY enthusiast, craftsman, or hobbyist we have the tools you need to get the job done.

SECTION 03

MITER SAW STANDS

BORA PORTACUBE STR MITER SAW WORKSTATION

PM-8000

The PM-8000 Portacube STR Miter Saw Workstation is the most revolutionary miter saw stand on the market. It combines the functionality of a portable miter saw stand with the essential qualities of a workstation, giving you a 2-in-1 piece of equipment that fits just about anywhere. Simply roll the Portacube to the middle of your garage, driveway, or wherever you can find a place to work — and open the extension wings for 2.13m (7') of workspace. To use your miter saw, just flip over the rotational table top to use your miter saw and raise the adjustable tool tables. Cleanup is easy — all you have to do is rotate your miter saw and fold down the wings, and you're ready to roll it back into storage.

Adjustable tool tables can be raised to the height of the miter saw, ranging from 50mm-114mm (2-4.5")

Ideal for miter saws, benchtop planers, and other power tabletop tools

Compact size measuring 787mm (31") x 736mm (29"), fitting into nearly any workshop

Accommodates miter saws up to 673mm (26.5") wide

Fits through standard 8128mm (32") door openings and has a 181.4kg weight capacity

Easily expands to provide up to 2.13m (7 feet) of working surface

Equipped with 254mm (10") wheels for convenient movement in the workshop

SECTION 04
MITERIX

PERFECT MITRES EVERY TIME.

MiteriX Angle Duplicator

Perfect miters every time.
Match any inside or outside
angle in three simple steps.

Match any angle – internal or external from
0-180 degrees.

Makes it easy to transfer
angles straight to your mitre
saw.

Foldable for easy storage
in
your toolbox.

OUTSIDE ANGLE

INSIDE ANGLE

1. Measure the exact mitre angle you
need.

2.Lock it in place to the required mitre
angle.

3.Remove arm and transfer set angle
to your mitre saw.

IT COULDN'T BE EASIER!

SECTION 05

CENTIPEDES & ACCESSORIES

IT'S TIME TO ELEVATE YOUR WORK.

Centipede Workstand

It's time to elevate your work! The Centipede provides a flexible workbench anywhere you need. Whether you are on the job or in the workshop, you will have the support needed to get the job done while doing your best work.

Creates a work station with a standard 760mm (30") working height or a tall version at 915mm (36")

Durable patented Polymer P-Tops won't mark the surface of your project or let saw blades cause potential damage to struts.

Heavy-Duty Steel Construction: Struts are flexible to absorb the impact from heavy objects and machinery, and durable enough to ensure long-lasting, smooth operation.

Available in multiple sizes to fit your needs.

Compact fold up design for easy transport.

Instant set up and tear down.

Ready to use right out of the box.
